ABOUT US

AluminumRock is one of the leading suppliers in China we're trusted as a provider of aluminum cosmetic packaging solutions to a variety of customers ranging from small businesses to some of the largest manufacturers in Europe, North America, South America.

The products in this catalogue are all carefully selected to meet the high standards of our clients and our complete offering has the correct ISO certifications.

At AluminumRock we will always strive to give our customers unique and flexible aluminum cosmetic packaging solutions with quick delivery and the best service and support on the market.

What Have We Achieved?

With just 4 years in the aluminum cosmetic containers, jar, canister, and tubes industry, we have achieved great strides. AluminumRock has successfully supplied big and small brands with customized aluminum aluminum cosmetic bottles, aluminum cosmetic tubes, aluminum cosmetic aluminum cosmetic jars. These are all thanks to our extensive know-how and expertise in delivering these services.

AluminumRock has successfully offered industry coverage to over **20+ countries** and has completed more than **350+ successful projects**.

We have over **100+ satisfied and happy clients**, and our passion for our business is continually pushing us to the limits of our know-how to not only provide high-quality and innovative products, but eco-friendly products and solutions as well.

Why Us?

High Responsibility for High-end Customizable Quality Assurance

Here at AluminumRock our products and services quality are important to us, as we hope to give our clients nothing but the best. To perfectly match client's high-end demand, we use standard Pantone colors.

The standard Pantone colors can be used either by **heat transfer, offset printing, UV coating, painting, or silk screen printing** to make sure all the design's requirements are met.

We also give our clients an opportunity for a **1 by 1 inspection** for every batch production. Not to mention that we check a higher percentage than most third-party inspection companies, as our inspection team follows the **SGS standard** strictly. We also make sure all our clients get access to our complete review, to ensure our defect rate is reduced to 0. Practices like such are not common in other aluminum cosmetic bottles customization companies, reasons why we have over **95% loyal returning customers**.

Different Quote Solutions for a Competitive Price

One of the reasons most of our clients are happy and satisfied with our services is that we help them to get very good and budget-friendly quote solutions and product prices.

We are not like other aluminum cosmetic bottles customization and sourcing companies that use low service fees to attract new clients. But in the long run, they have very high and expensive quote prices.

We also tell and encourage our clients that they are free to make product price comparisons as our **prices are 50% lower** than the price from the local city. This will help them to make sure that they get their products at a very competitive price.

Why Us?

Lightning-Fast Delivery

One of the benefits our clients enjoy when they use our services is that they get to have their goods delivered to them at lightning fast delivery, **at most 90 days**.

This makes us very proud of the delivery services we offer to our customers.

Professional Chinese Team with Extensive Experience

AluminumRock staffing is made up of a professional team that has extensive knowledge and experience in customizing and manufacturing for a wide range of quality **aluminum cosmetic bottles, aluminum cosmetic jars, aluminum cosmetic tubes**, and so on.

Aside from that, our professional team has worked with and understood both small entrepreneurs and big ones. And they give extra time and a helping hand to ensure that the two fully explore their options.

Why Us?

Start With Low MOQ

Another reason why you should patronize AluminumRock instead of others is that we offer the opportunity to start with a **low MOQ 3,000 units** an order, instead of 5,000 units as usual.

That way, it helps you taste the waters, especially if you are about to start a business.

Taking your project seriously in a Long-term Relationship

We are here for our clients, so we understand the need for taking every single project of our clients seriously. No matter the size or specifications of the project.

Through a **Zoom Video meeting** you can tell us all you need. We ensure that all their orders are fully met, and nothing is missing, as we pay close attention to the details.

We do these to sustain a long-term and healthy relationship with all our clients.

And in the case where you mistakenly receive a defective product, the chances of which are very rare, we ensure that you will get what you ordered for, and also **compensate 100%** for any inconvenience to help reduce the loss you may encounter. This helps to ensure a **100% money back guarantee**.

The same cannot be said for some other Chinese aluminum cosmetic packaging suppliers out there.

At AluminumRock, we understand how important choosing the right aluminum cosmetic packaging for your business is. Whether cosmetic, skincare or personal care products.

This must be properly done to avoid spilling the contents.

With us, you can make your unique and high-end aluminum cosmetic packaging. Like **aluminum cosmetic containers**, **aluminum cosmetic jars**, **aluminum cosmetic tubes**.

The right aluminum cosmetic packaging has proven to effectively skyrocket sales. Why not leverage our quality service and get durable, safe, functional, and appealing aluminum cosmetic packaging solutions.

Successful Aluminum Cosmetic Packaging Solution For Clients

Aluminum Cosmetic Bottles

OUR PRODUCTS

At AluminumRock, our skilled and experienced in-house design team is dedicated to fulfilling your aluminum cosmetic bottles, aluminum cosmetic jars, aluminum cosmetic tubes customization needs.

ALUMINUM COMESTIC PACKAGING

Aluminum Cosmetic Jars

Aluminum Cosmetic Tues

Working with us is very easy.

When you patronize and do business with AluminumRock, you'll see how very easy our business patterns are.

Right from choosing and customizing your ideal aluminum cosmetic containers.

Our process can be done in four (4) easy steps!

Choose the bottle

Choose the accessories

Add screen printing

Packaging

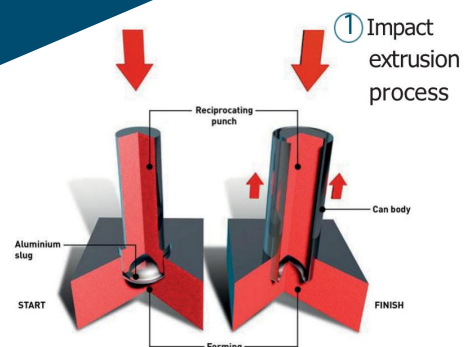

How Is a Finished Aluminum Cosmetic Bottles Made?

At AluminumRock, our finished aluminum cosmetics bottles are made with five processes!

Impact Extrusion Press

This is the first step in the manufacturing process. Impact extrusion press is similar to drawing and extrusion. In this process, the aluminum cosmetic containers and other products are made from a metal slug.

The metal slug is first pressed at a very high velocity. This is done with lots of force, and it forces the slug into a die or a mold by a punch. The production of the AluminumRock impact extrusion process is about **200 cans per minute**.

Internal Coating Machine

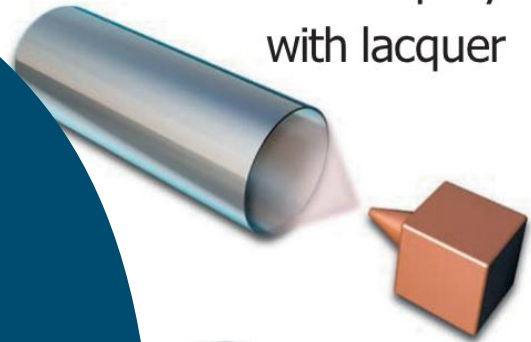

Internal machines are the next step. Internal coating in AluminumRock consists of fusion-bonded epoxy. It provides low frictional resistance in the containers and also prevents encrustation.

Our internal coating machine has **nine (9) spray guns**, and each container is **sprayed three (3) times** during production.

Design printing and overvarnish

The inside of each can is sprayed with lacquer

Offset Printing Machine

Our offset printing machines are fitted with servo-motor-driven ink rollers. And all the inking units are controlled individually on the touch panel.

Making it very easy to be controlled. It also makes it easy to apply the **nine (9) offset colors** on all the produced aluminum bottles.

Necking

Choose the accessories

Necking Machine

At AluminumRock, we have a **42-Station necking technology**. This technology contains an embossing process.

This can be used to create almost any kind of shape of an aluminum bottle.

Accessories Matching

We have **hundreds of accessories** that are available for you to pick from.

But whichever we pick, or you choose will match your container and give it a perfect and unique look.

The Top 8 Benefits Of Aluminum Cosmetic Containers And Aluminum Cosmetic Bottles

1 - Lightweight

One of the reasons aluminum is preferred over other cosmetic packaging is that it is the lightest metal that is available on the market.

Because it is light, it makes it easy to be transported and cheaper as well. They are also easier to store and recycle. These reasons make aluminum the preferred one over other aluminum cosmetic bottles.

Because it is lightweight, it's also portable and easy to carry around.

2 - Conductive

The conductive properties of Aluminum make it important for cosmetic package. This is because it has a higher heat transfer rate than other metals like iron.

The aluminum cosmetic bottles are also very suitable for cosmetic ingredients because they are stable. This is because of its temperature resistance.

3 - Formable

The ability of aluminum to be molded into any size or form makes it very important in cosmetic packaging. Why is aluminum formable? It is composed of soft and durable materials.

These properties of aluminum help to enhance the possibility of shelf differentiation. Which is very important to quickly respond to the ever-changing market trends and shortening the development cycle.

4 - Decorative

Because aluminum can be **printed in 360 degrees**, several printing processes are used by designers. This creates room for creativity.

Also, being able to print on aluminum makes it a lot easier to grab customers' attention and keep them. Especially in a homogeneous packaging market.

This helps to draw attention to the shelf and to increase the cosmetics brand exposure.

5 - Protective

aluminum cosmetic bottles have a seamless metal appearance and are durable. This makes them one of the most preferred choices for any liquid.

This provides added protection to your products, whether cosmetic, healthcare, or beverage.

It also protects them from moisture and oxygen. Which are destructive factors that can cause discoloration, growth of molds, bacteria growth, and presence of slimy textures in drinks.

6 - Recyclable and Environment Friendly

One of the main differences between aluminum cosmetic bottles and other materials is their ability to be recycled. The recyclability of aluminum makes it a better alternative than its competition in the market.

Recycling aluminum helps to protect the environment by saying goodbye to plastics. This is also important if your brand chooses to move towards more sustainable practice.

7 - Anti-counterfeiting

aluminum cosmetic bottles have a seamless metal appearance and are durable. This makes them one of the most preferred choices for any liquid.

This provides added protection to your products, whether cosmetic, healthcare, or beverage.

It also protects them from moisture and oxygen. Which are destructive factors that can cause discoloration, growth of molds, bacteria growth, and presence of slimy textures in drinks.

8 - Airtight Container

One of the main differences between aluminum cosmetic bottles and other materials is their ability to be recycled. The recyclability of aluminum makes it a better alternative than its competition in the market.

Recycling aluminum helps to protect the environment by saying goodbye to plastics. This is also important if your brand chooses to move towards more sustainable practice.

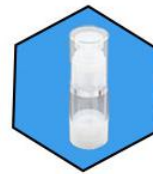

What's The Difference Among Cosmetic Bottles In Aluminum, Plastic, Stainless Steel, Tin And Glass?

COMPARISON AMONG BOTTLE MATERIALS OF ALUMINUM, GLASS, PLASTIC

Aluminum Bottle

VS

Plastic Bottle

| | | |
|------------|---------------------|--------------|
| Easy | Recycle | Hard |
| None | BPA | Found |
| Block 100% | Light Transmittance | Translucency |

Aluminum Bottle

VS

Glass Bottle

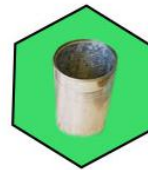

| | | |
|---------|----------------------|--------|
| Easy | Recycle | Hard |
| Cheaper | Shipping Cost | Higher |
| None | Fragile | Easy |

COMPARISON AMONG BOTTLE MATERIALS OF ALUMINUM, STAINLESS STEEL, TIN

Aluminum Bottle

VS

Tin Can

| | | |
|------------------|--------------------|-----------------|
| Light | Weight | Heavier |
| Highly Formative | Variability | Limit Formative |
| Very Stable | Stability | Easy To Rust |

Aluminum Bottle

VS

Stainless Steel Bottle

| | | |
|----------------------|----------------------|------------------------|
| Cheaper | Cost | Higher |
| Cheaper | Shipping Cost | Higher |
| Single-wall | Vacuum | Double-wall |
| 100% leak-proof | Leak | Possible |
| Wider | Applications | Narrower |
| 2.7g/cm ³ | Density | 7.8-8g/cm ³ |
| Much Easier | Variability | Easy |

What Are The Important Things You Should Know About Aluminum Cosmetic Bottles Production?

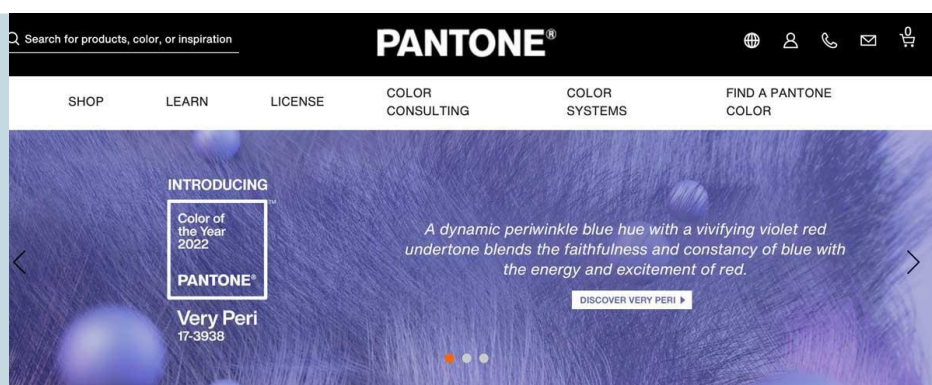

1. The five (5) types of printing that are mostly used for aluminum cosmetic bottles are:

- Heat transfer printing
- Painting
- Offset printing
- Silkscreen printing
- UV coating

2. What is the major printing difference you must know?

| Printing | Color | Gradient | Shoulder Printing | MOQ |
|-----------------|----------|-------------|-------------------|-------------|
| UV Coating | <2 color | Unavailable | Unavailable | 3,000units |
| Silk Screen | <2 color | Unavailable | Unavailable | 3,000units |
| Heat Transfer | 9 colors | Available | Unavailable | 3,000units |
| Offset Printing | 9 colors | Available | Available | 30,000units |

What Are The Four (4) Things You Must Know About The Printing Of Aluminum Cosmetic Bottles?

1 - PANTONE Color

This is a world-renowned color authority. It covers all the color communication systems of printing that are used in different sectors and surfaces. Like graphics, plastics, digital technology, textiles, and many others.

Because of the widespread use of The Pantone color and the different varieties, we recommend that our customers mark or highlight the number of the Pantone colors on their chosen artwork.

In most graphic tools like Photoshop and Adobe Illustrator, the Pantone number is easily substituted. The substitute can be an RGB or HEX value. And it is always very close to the Pantone color number.

The Pantone colors in the aluminum cosmetic bottles artwork are of three types:

- Metal color card: start with 8, such as 8312
- Uncoated color card: end with U letter, such as 3330U
- Coated color card: end with C letter, such as 3330C

2 - Nine (9) Colors Printing

Whenever you come across nine (9) colors printing in Aluminum cosmetic packaging printing, it means only one thing. That, at least, or at most, there are only 9 spot colors or Pantone colors on the draft of the design.

That is to say, if your artwork has more than nine (9) colors, some colors would be mixed using a color contrast.

The printing effect of mixed colors always comes out worse than using the exact nine (9) colors. That's why you need to stick to [nine \(9\), or below](#).

3 - Creating Outlines

The designer will have to create outlines before you can send in your artwork. This makes it easier. As for us, we can open your artwork, whether the fonts are on our systems or not.

4. Artwork Requirements for Custom Printing

The following requirements are preferred for custom printing artwork:

Two files (AI and PDF), AI is used for modifying and plate making, PDF is used to confirm the overall effect.

- Software: [Illustrator CC 2018](#) (or lower), CorelDRAW X8 (or lower)
- Vectorized Illustrator file (AI, EPS) Fonts to be delivered separately (only used in case of text changes)
- Illustrations in artwork: [300dpi should be included](#).

Additional Requirements:

Colors: The number of plates or colors are **limited to eight (8)**. Fine screens, barcodes, small positive texts can or must be placed on a separate plate.

Full-color work: Printing of more than two (2) colors on top of each other is limited because of ink contamination. The special Pantone colors have preference over CMYK.

Barcode Bars: Should be in a **horizontal position**.

Colors:
Base coat: white, transparent;
Inks: all PANTONE Colors;
Over-varnish: gloss, matte.

Type size: Positive text ≥ 5 pt;
Negative text ≥ 6 pt

Line size: Positive lines ≥ 0.4 p;
Negative lines ≥ 0.5 pt

Estimated Custom Cost

All the money paid to AluminumRock for the purchase of their products is secured.

Below is an outline of the costs you may likely incur:

- Sample Product Fee
- Shipping Fee
- Miscellaneous Fee
- 30% T/T Fee
- 70% Final Fee

Sample Product Fee

The key to making an ideal product is to Customize the samples. So the first cost is the sampling fee.

This money is for a single sample if it is one that you need. With several samples, you'll pay a bit more.

Estimated Custom Cost

Shipping Fee

This is the amount of money that you will pay for the transportation of your products from the factory to your doorstep. AluminumRock offers you convenience of any kind.

Miscellaneous Fee

It is any other fees relating to taxes, service fees, penalties, and late fees. They are usually low-cost amounts.

30% T/T Fee

It is any other fees relating to taxes, service fees, penalties, and late fees. They are usually low-cost amounts.

70% Final Fee

Complete your payment within a certain period and receive the products you ordered for.

Estimated time for Manufacturing and Shipping

AluminumRock works even faster than your local aluminum cosmetic bottles suppliers. Coupled with the increasing and steady number of customers patronizing us, we have no other option than to make speed one of our top priorities.

Let's take a look at the different steps and processes of customization and shipping:

STEP 1: Sampling And Manufacturing Time

At AluminumRock, sampling of your choice aluminum cosmetic containers or aluminum cosmetic bottles might take **1-2 weeks** in our factory.

After that, we proceed to customize the samples into finished products. This is done during the manufacturing process that may take **at most 20 days**.

Estimated time for Manufacturing and Shipping

STEP 2: Time For Packing And Boxing All Products

Depending on the number of aluminum cosmetic bottles, our well-experienced staff packs your products in fitting cartons and pallets. This will not take them a long time to achieve.

Because it is an easy task for our well-trained staff. The time taken for this may range from **1-2 days**.

STEP 3: Custom Clearance And Loading Time

This is the time it takes for our staff to load your products onto the AluminumRock van. Once the products are cleared, our drivers are then responsible for the products. They make sure they deliver them to various dispatch points.

This whole process may take about **3-5 days**.

Estimated time for Manufacturing and Shipping

STEP 4: Sea And Land Transportation Time

Once your products get to the destination you stated, you will get an alert.

You can then continue the plan for your shipped goods.

Frequently Asked Questions

Do You Offer Free Samples?

Yes, we do. You can choose the favorite aluminum cosmetic containers and the accessories or we will recommend, all of them are free.

You only have to **pay a little fee, which is the express fee.**

If a Product Is Damaged During Shipping, Can It Be Replaced?

Although the chances of this happening are very rare as we ensure that all your products will be carefully and well-packaged before it is shipped.

But in the situation where it happens, do not hesitate to reach out to our customer care services through our website. They are better equipped to give you the right advice.

Frequently Asked Questions

If My Order Is Delayed, What Am I Supposed To Do?

If you have an order that has been delayed for more than **4 to 7 days**, you can go ahead and email AluminumRock customer care services from our website. They will provide further assistance accordingly.

But you must know that sometimes the cause of your order being delayed is due to some unavoidable and unforeseen circumstances. In this case, it is best to exercise patience, as we are sure to give you a valid reason for the delay of your order.

When I Order Goods, How Long Does It Take Before I Receive Them?

Normally, shipping should take about **30 to 80 working days** depending on different countries. But in some instances, it can take **up to 90 working days**. This may be due to trouble within the shipping company.

Frequently Asked Questions

Are You On Facebook Or Any Other Social Media Platforms?

At the moment, we are not on the Facebook platform or any other social media platforms. But you can easily contact us using our email that can be found on our website.
