For the round shoulders regular bottle, **15ml to 1L** volume is available

KEY MESSAGES YOU NEED TO KNOW

The size of the aluminum slug determines the diameter of the bottle,

and one diameter of the slug can be stretched to different heights, in this stretching process,

while the general factory will adjust the whole straight shape into **round shoulders**.

so the regular round -shouldered bottles are all of the above shapes, with only the difference in capacity.

If you need shaped bottles such as the overall square shape, the shoulder is flat, square, or anything that is not round can be customized.
